🎓 EDUCATION

M.sc in Software Engineering

University of Europe for applied sciences

03/2026 – Present | Postdam, Germany

Bachelor of Engineering (B.E) -

Computer Engineering

Sardar Patel College of Engineering

2021 – 2024

- CGPA: 8.00

Diploma in Computer Engineering

BBIT

2018 – 2021

- CGPA: 7.07

👤 ABOUT ME

Full-Stack Engineer with 2.5 years of experience in cross-platform mobile development (Flutter) and production LLM systems. Deployed 2+ open-source agentic AI products using LangGraph, FastAPI, and async Python, implementing persistent memory and RAG architecture. Targeting AI Software Engineer / Backend Werkstudent roles to scale autonomous workflows and optimize system performance.

💼 EXPERIENCE

Rise Technologies

Software Developer

04/2024 – 06/2025

- Improved client delivery cycles by 25% by architecting and shipping production Flutter and React.js applications with async Python data handling and optimized state management patterns.
- Reduced application load time by 30% by refactoring frontend into a reusable component architecture, eliminating redundant render cycles across mobile and web platforms.
- Cut critical API integration errors to near-zero by building a centralized RESTful API layer with robust error handling, async retry logic, and structured logging.
- Increased team velocity by implementing modular Node.js backend architecture, improving code ownership clarity and reducing onboarding ramp-up time for new contributors.

Ultron Technologies

Flutter Developer Intern

12/2024 – 03/2025

- Reduced patient registration processing time by building core HMS features for appointment and patient-intake workflows using Flutter and Firebase, handling 500+ daily records.
- Improved UI frame rate by 20% by refactoring widget build trees into a modular architecture, eliminating rendering bottlenecks in high-frequency patient management screens.
- Ensured real-time data consistency across concurrent sessions by integrating Firestore with structured MVVM data models and optimized query listeners.

Technoguide Infosoft PVT Ltd.

Web Development Intern

11/2023 – 12/2023

- Eliminated manual lead tracking overhead by 60% by designing and deploying a full-stack CRM application using Laravel and MySQL, digitizing end-to-end lead management workflows.

TECHNICAL SKILLS

Frontend

Flutter, React.js, TypeScript, JavaScript

Backend

Python, FastAPI, Node.js, CI/CD, PHP,
Java, RESTful APIs, Agentic AI
Architecture.

API Integrations

OpenAI API, Gemini API, Anthropic API,
REST APIs, WebSockets, Server-Sent
Events, WhatsApp API, Gmail API,
Notion API

Database

Supabase, Firebase, PostgreSQL,
MongoDB

Ai/LLM

LangGraph, CrewAI, RAG Pipelines,
Prompt Engineering, Gemini API,
OpenAI API, Langfuse, MCP
Orchestration, Agentic AI.

Dev-ops

Docker, GitHub Actions, Fly.io, Vercel

INTERESTS

Music

A dedicated listener who enjoys
exploring diverse genres and
understanding the technical production
behind the sound.

Strategic Gaming

Enjoying complex strategy games that
require quick decision-making and
logical analysis.

Cycling & Off-roading

I spend my free time on long-distance
rides and off-road trails, enjoying the
challenge of navigating tough terrain
and staying active outdoor.

- Improved backend query response time by 25% by refactoring raw SQL into optimized indexed queries and restructuring the codebase into modular service components.

PROJECTS

RAG+MCP Business Agent

03/2026

- Telegram bot backed by LangGraph + ChromaDB.
- Has persistent memory, real-time web search, and a human-in-the-loop approval step before it takes any action.

Werkstudent Job Hunter Agent

Python · GitHub Actions · Supabase · Gmail API ·
Notion API

- Built an automated job-matching pipeline that scrapes, filters, and ranks Werkstudent listings daily
- Delivered a curated job digest to Gmail using GitHub Actions as a serverless cron scheduler
- Stored and deduplicated listings in Supabase with Notion integration for structured tracking

AgentWatch — Open-Source LLM Observability Platform

(FastAPI · Supabase · Supabase Realtime · Next.js ·
Fly.io · Vercel)

- Built a free, self-hostable LLM observability dashboard as an open-source alternative to Langfuse and LangSmith
- Implemented real-time agent trace streaming using Supabase Realtime WebSockets and FastAPI async endpoints
- Deployed production-grade backend on Fly.io with Next.js frontend on Vercel using zero-cost infrastructure stack

StudyRAG

03/2026

- A premium AI-powered study assistant
- Featuring RAG-based tutoring, automated flashcard generation
- Interactive quizzes, and visual progress analytics

Friday Assistant

- Friday Assistant is a next-generation voice-activated Personal AI companion built with Flutter.
- Features real-time web access, long-term memory, and proactive notifications, and futuristic holographic UI powered by Groq AI

FoodInsight Ai

Flutter, Dart, Firebase, Agentic Ai

01/2026 – Present

- Developed a Computer Vision solution to eliminate inaccurate

LANGUAGES

English	
Hindi	
Gujarati	
German A2 (Learning)	

- Calorie logging by integrating RESTful APIs for instant food recognition and automated nutritional analysis.

Live Client Student Management ERP

(Flutter/Dart)

06/2024 – 06/2025

- Optimized administrative workflows by digitizing manual record-keeping via a custom Full-stack system, reducing data entry time through Firestore database optimization.
